Hands-Up Scotland

Executive Summary

The 2008 National Hands-Up Survey was the first national dataset designed to look at mode of travel to school across Scotland. In 2009 the survey was repeated using the same methodology. In both years the question 'How do you normally travel to school?' was asked over the same one week period in September. The survey is a joint project between School Travel Co-ordinators working in Scotland and Sustrans.

In 2008 over 396,000 children (1,824 schools) responded; this increased to over 415,000 children (1,939 schools) in 2009.

Active travel

- 49.9% of children surveyed in 2009 travelled to school in an active way (walking, cycling or using a scooter or skate board) compared to 51.8% in 2008
- walking was the most frequent form of active travel in both 2008 and 2009 (48.3% and 47.0% respectively)
- 2.3% of all pupils cycled in 2009 compared to 2.8% in 2008
- primary school children are most likely to cycle to school with 3.4% choosing this method in 2008 and 3.0% in 2009
- independent school children are less likely to travel to school in an active way than those in state schools. 25.2% of independent school children travelled to school in an active way in 2009 compared to 29.8% in 2008.

Motorised travel

- 22.0% of all children were driven to school in 2008, this increased by 1.3 percentage points to 23.3% in 2009
- the majority of children driven to school attend independent schools with 42.4% driven to school in 2008 and 53.1% in 2009
- 18.2% of children took the bus to school in 2008, similar to 18.1% of children choosing this method in 2009
- bus was the most common mode of motorised travel among secondary school pupils in both years, this has decreased from 37.2% in 2008 to 35.9% in 2009.

Transition from primary school to secondary school

- the results illustrate that travel behaviour between primary and secondary school pupils is quite different
- secondary pupils are less likely than primary pupils to travel to school actively. In 2009, 44.2% of secondary school and 53.3% of primary school pupils travelled by active modes. Similarly, in 2008, 44.6% of secondary school and 56.0% of primary school children travelled using active modes
- secondary school children are more likely to travel by bus (35.9% compared to 8.5% of primary) in 2009; corresponding 2008 figures are 37.2% and 8.7% respectively
- conversely, car use decreases in the transition from primary to secondary school in 2008 and 2009. 12.7% of secondary school pupils were driven to school in 2008 compared to 26.1% of primary school children. In 2009, 27.9% of primary school children and 14.3% of secondary school children were driven to school.

Response rates

- on a national level, response rates have increased by 4.7% from 2008 to 2009. As a proportion of the total Scottish school roll, response rates have increased from 55.7% in 2008 to 58.8% in 2009
- there has been an increase in response rates across all school categories except for the independent schools. Both primary and secondary schools increased by 10.6%, and SEN schools by 69.8%.

1 Introduction and Overview

1.1 The National Hands-Up Survey

The National Hands-Up Survey is the largest national dataset to look at mode of travel to school across Scotland. The survey is a joint project between School Travel Co-ordinators working in Scotland and Sustrans. The 2008 survey was the first time the national survey was conducted. The process has been repeated in 2009 using the same methodology, providing comparative data.

1.2 Data collection and collation

The Hands-Up Survey runs on an annual basis in the autumn of each year. Data collection is conducted by schools, instructed by their School Travel Co-ordinator, with support from Sustrans. Data collection took place on one day between the 7th and 11th September 2009 (the same week as the 2008 survey). The question asked in the Hands-up survey is, 'How do you normally travel to school?', with the response options: Walk, Cycle, Scooter/Skate, Park and Stride (drive part of the way and walk the rest), Driven, Bus, Taxi and Other. Completed forms were returned by the school to their School Travel Co-ordinator, with collated datasets returned to Sustrans. Overall collation, analysis and reporting has been conducted by Sustrans' Research and Monitoring Unit.

1.3 Sample size

All Local Authorities were invited to take part in the National Hands-Up Survey. During 2008, 30 Local Authorities participated. The total sample comprised of responses from 396,377 children (1,824 schools) across Scotland. In 2009, 31 Local Authorities participated, with responses from 417,542 children (1,939 schools - not including nursery schools).

Table 1.1 shows the number of schools which received the survey and the number of schools which completed the survey (these are split by school type). Table 1.2 shows overall change in sample size between 2008 and 2009 at both a national level and by school type. Table 1.3 shows the change in participation for each Local Authority between 2008 and 2009 and Tables 1.4 to 1.7 show the change in sample size by Local Authorities for primary, secondary, independent and SEN schools respectively. Tables 1.3 to 1.7 also show the response rates for each Local Authority as a proportion of the total school roll. The total school roll figures have been sourced from the Scottish Government's school statistics.

Please note that where the sample size is small (totalling less than 100), particular care should be taken when interpreting results. It should also be noted that there are instances where sample sizes are small due to the size of the Local Authority. Also note that due to rounding, row percentages may not always add up to 100%.

Where a percentage represents a value between one and four children, it has been replaced with an asterisk (*) for data confidentiality purposes. Where data is missing/not available this has been replaced with a dash (-).

1.4 Nursery data

In 2009, the option for Local Authorities to collect additional data from nursery schools was provided. It should be noted that nursery data is presented separately throughout this report, and has not been included in the overall data at national and Local Authority level.

Table 1.1 School sample numbers on which analysis is based

	Year	Received Survey	Returned Data	Split by Class
Nursery*	2009	306	238	No class split possible
Primary Schools	2008	2029	1587	1352
			78.2%	66.6%
	2009	1980	1658	1199
			83.7%	60.6%

Who says P.E. class can't start at the front door?

Sustrans is the UK's leading sustainable transport charity. Our vision is a world in which people choose to travel in ways that benefit their health and the environment. We are the charity working with children in schools, with families at home, with employers and with communities to enable people to travel more by foot, bike and public transport.

Sustrans is a doing charity working with many partners to bring about real change. Our thousands of supporters have enabled us to change our world one mile at a time. You can too.
